

# County Administrator's Report

**April 6, 2016**

# Staff Stars and Community Efforts

- **Good news:** We now have public safety radio coverage in the high school. The amplifier has been installed and the system was tested Wednesday, **March 23<sup>rd</sup>**.
  - The amplifier system includes a series of five-inch antennas throughout the building, connecting to a roof antenna that can “talk” to our current public safety radio system.
  - When the new radio system comes on line, this system will simply be re-tuned to the new frequencies.
  - Firefighters and law enforcement will no longer need to form 2-3 person relays to get signal out of the building, but can communicate directly with dispatch and with each other.

# Staff Stars and Community Efforts

- **Fluvanna High School Forensics Team**
  - Won Division 3 State Championship
  - Ten Flucos qualified for Nationals

- **New stainless steel  
Kennel Doors at FSPCA**
